

SCGP

VPRO

**Total solutions for
rotating equipment**

**A real-time monitoring and fault diagnostics system
for analyzing mechanical failures.**

Highlight Features

- Vibration and temperature real time monitoring
- Fault diagnostics by AI
- Expert supervision

Benefits

- Increase reliability of rotating machines up to 50%
- Early mechanical fault detection
- Reduce power consumption up to 15%

VPRO

Total solutions for rotating equipment

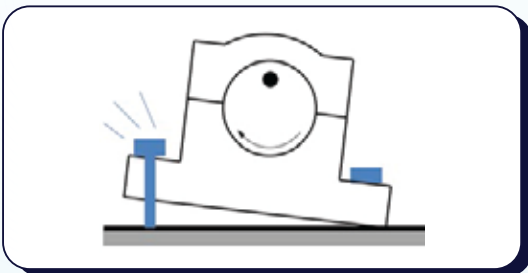

AI-Powered Vibration Prediction with IoT

Our AI continuously learns your machine's unique vibration signature and predicts failure modes.

Misalignment

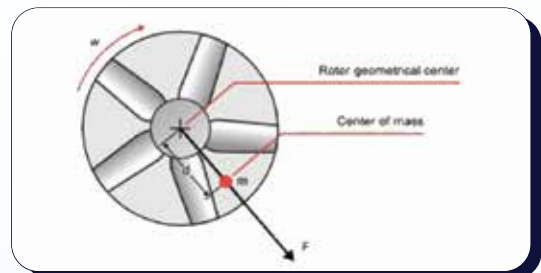

Looseness

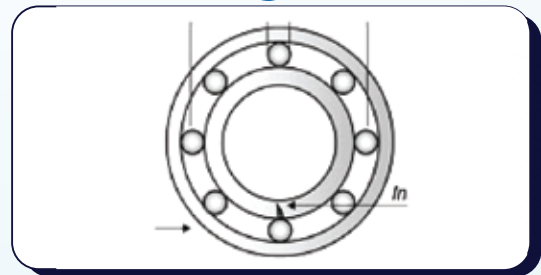

Wear issues

Unbalance

Bearing defect

Resonance
