

Boiler & Turbine Solutions

Total solutions of boiler and steam turbine with all auxiliary equipment in your plant for your best performance and reliability

Boiler Services

- Boiler Inspection
- Water Treatment

Reliability and Performance Solutions

- Plant Assessment
- Diagnostic and Trouble Shooting
- Reliability and Performance Monitoring
- Optimization Solutions

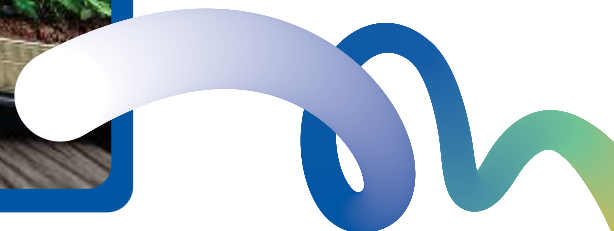

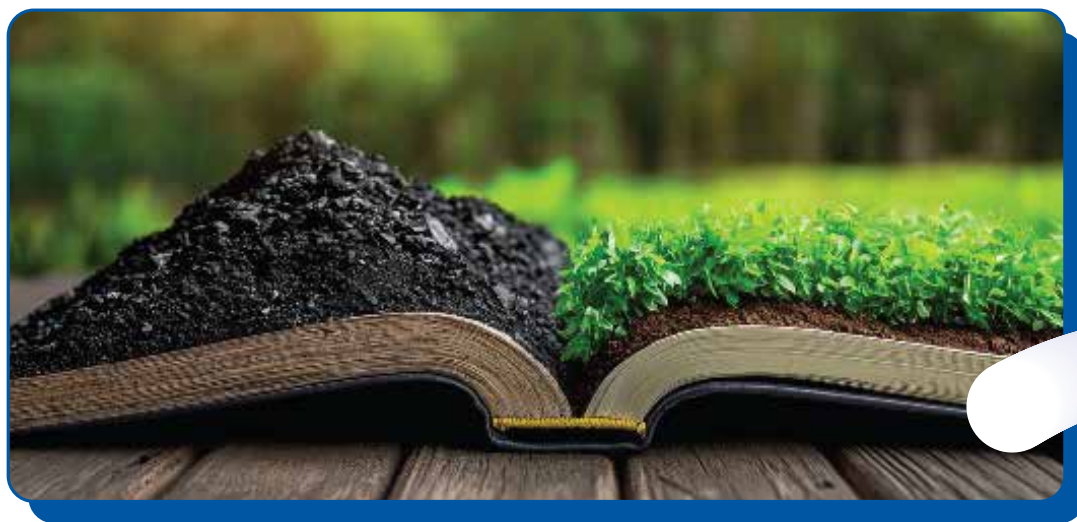

Steam Turbine and Generator Services

- Steam Turbine and Generator Overhaul
- Steam Turbine and Generator Function Test

Green Fuel Transition Engineering Services

Green fuel transition engineering services

A clean energy solutions for solid-fuel boiler systems

Highlight Features

- **Experience** in coal-to-biomass conversion
- Comprehensive **assessment and feasibility**
- **Advanced software** for analysis and prediction
- **Data-driven** approach with engineering calculations

Benefit

- **Low carbon** transition
- **Low-investment** biomass integration
- Improved **energy efficiency**
- Enhanced **system stability**
